EDUCATION

University of New South Wales (UNSW)

Feb 2021 – Present

Bachelor of Commerce (Finance)/Bachelor of Engineering (Software)(Honours)

University of Illinois Urbana Champaign – Fall Exchange Semester

Aug 2025 – Dec 2025

Grainger College of Engineering - Computer Science

PROFESSIONAL EXPERIENCE

Amazon Web Services: Solutions Architect Intern

Dec 2025 – Feb 2026

- Architected and deployed a GenAI solution on AWS (LLM + RAG) to convert unstructured pathology documents into structured FHIR resources, storing outputs in HealthLake and enabling analytics via S3 and Athena.
- Partnered with 5+ customers to translate business needs into technical requirements and AWS solution designs, delivering 8+ architecture diagrams and implementation plans with defined success metrics.
- Delivered cost optimisation opportunities across customer AWS architectures, recommending right-sizing, serverless and storage tiering changes that reduced projected cloud costs by 20%.

IBM: Software Support Engineer Intern

Feb 2025 – Aug 2025

- Collaborated with product, SRE, and engineering teams to triage and resolve enterprise software incidents, translating technical issues into actionable fixes and improved support workflows
- Analyzed system logs and SQL/DB2 data to identify root causes and recommend reliability improvements across client deployments

Gartner: B2B Technology Advisory Sales Intern

Dec 2024 – Feb 2025

- Researched and analysed technology challenges faced by 100+ mid-size enterprise clients, leveraging Gartner insights to provide data-driven recommendations, improving client decision-making efficiency by 30%.
- Facilitated the B2B sales cycle by engaging with prospects and liaising with C-level execs in managing a \$500K+ sales pipeline, gaining hands-on experience in CRM, lead qualification, and consultative selling of complex solutions.

PROJECTS

SplitRight Application: Full-Stack Developer

Jan 2025 – Mar 2025

- Developed a full-stack expense-splitting app with a Python Flask backend, React.js frontend, and local storage strategy, deployed on AWS EKS with Kubernetes-based autoscaling.
- Built an automated load-testing framework to simulate high-traffic scenarios, enabling observability-driven optimizations and enhancing system reliability through Kubernetes self-healing and intelligent alerting.

Sushi-Invoice Management: Team-Lead – Full-Stack Development

Feb 2025 – May 2025

- Developed a robust invoice-generation backend using Node.js and Express.js, enhanced by integrating a Large Language Model (LLM) for invoice generation, file search and customer support.
- Architected and deployed scalable AWS infrastructure using Elastic Beanstalk, DynamoDB, S3, and CodePipeline. Applied Infrastructure-as-Code (IaC) to automate deployments and ensure environment consistency.

LEADERSHIP & EXTRA CURRICULARS

180 Degree Consulting: Project Consultant

Mar 2021 – Mar 2022

- Assisted in analysing the current operating model of a not-for-profit environmental organisation to achieve funding.
- Designed a suitable business model through excel modelling for a non-for-profit start up to provide mentoring services and create impact through building a start-up hub.

UNSW Finance and Banking Society: General Secretary

Mar 2021 – Aug 2024

- Oversaw the society as General Secretary, managing finances, leading a team of six, enhancing student well-being, and handling the recruitment process for 248 applicants.

TECHNICAL SKILLS

Languages: Python, Shell, Java, SQL, HTML & CSS, JavaScript, TypeScript, C, Haskell, C++

Developer Tools: Linux/Unit, GitHub, GitLab, Jira, AWS, IaC, TensorFlow, PyTorch

AI Developer Tools: Claude Code, Codex, RAG, Prompt engineering, Agentic workflow
